

## Product datasheet

info@arigobio.com

# ARG22079 anti-CD94 / KLRD1 antibody [18d3] (Biotin)

Package: 100 μg Store at: 4°C

#### **Summary**

Product Description Biotin-conjugated Rat Monoclonal antibody [18d3] recognizes CD94 / KLRD1

Tested Reactivity Ms
Tested Application FACS

Specificity Mouse CD94

Host Rat

Clonality Monoclonal

Clone 18d3

Target Name IgG2a, kappa
CD94 / KLRD1

Species Mouse

Immunogen CHO cells transfected with the B6 allele of CD94

Conjugation Biotin

Alternate Names KP43; CD antigen CD94; CD94; Natural killer cells antigen CD94; Killer cell lectin-like receptor subfamily

D member 1; NK cell receptor

#### **Application Instructions**

Application table	Application	Dilution
	FACS	< 1 μg/10^6 cells
Application Note	* The dilutions indicate recommended starting dilutions and the optimal dilutions or concentrations should be determined by the scientist.	

### **Properties**

Form Liquid

Buffer PBS and 0.1% Sodium azide.

Preservative 0.1% Sodium azide

Concentration 0.5 mg/ml

Storage instruction Aliquot and store in the dark at 2-8°C. Keep protected from prolonged exposure to light. Avoid

repeated freeze/thaw cycles. Suggest spin the vial prior to opening. The antibody solution should be

gently mixed before use.

Note For laboratory research only, not for drug, diagnostic or other use.

#### Bioinformation

Database links GeneID: 16643 Mouse

Swiss-port # O54707 Mouse

Gene Symbol KLRD1

Gene Full Name killer cell lectin-like receptor, subfamily D, member 1

Background Natural killer (NK) cells are a distinct lineage of lymphocytes that mediate cytotoxic activity and secrete

cytokines upon immune stimulation. Several genes of the C-type lectin superfamily, including members of the NKG2 family, are expressed by NK cells and may be involved in the regulation of NK cell function. KLRD1 (CD94) is an antigen preferentially expressed on NK cells and is classified as a type II membrane protein because it has an external C terminus. Three transcript variants encoding two different isoforms

have been found for this gene. [provided by RefSeq, Jul 2008]

Function Plays a role as a receptor for the recognition of MHC class I HLA-E molecules by NK cells and some

cytotoxic T-cells. [UniProt]

Calculated Mw 21 kDa
