ARG22109 anti-Ly6G + Ly6C antibody [RB6-8C5] (Cyanine 5)

Package: 50 μg Store at: 4°C

Summary

Product Description Cyanine 5-conjugated Rat Monoclonal antibody [RB6-8C5] recognizes Ly6G + Ly6C

Tested Reactivity Ms

Tested Application Depletion, FACS, IHC-Fr

Specificity This antibody recognizes the mouse Gr-1 antigen, a ~21 - 25 kDa GPI anchored cell surface protein

bearing a single uPAR/Ly6 domain that belongs to the Ly-6 family of proteins (Lee et al. 2013). Clone RB6-8C5 reacts predominantly with the Ly-6G protein but weaker reactivity with the Ly-6C protein has been reported (Fleming et al. 1993). However, other observations dispute the cross-reactivity of clone RB6-8C5 with the Ly-6C protein with the alternative explanation that certain sub-populations of bone

marrow cells simultaneously express both Ly-6C and Ly-6G (Nagendra et al. 2007).

Host Rat

Clone RB6-8C5

Isotype IgG2b, kappa
Target Name Ly6G + Ly6C

Species Mouse

Conjugation Cyanine 5

Alternate Names Gr1; Gr-1; Ly-6G

Application Instructions

Application table	Application	Dilution
	Depletion	Assay-dependent
	FACS	< 0.03 µg/10^6 cells
	IHC-Fr	Assay-dependent
Application Note	* The dilutions indicate recommended starting dilutions and the optimal dilutions or concentrations should be determined by the scientist.	

Properties

Form Liquid

Buffer PBS and 0.1% Sodium azide.

Preservative 0.1% Sodium azide

Concentration 0.1 mg/ml

Storage instruction Aliquot and store in the dark at 2-8°C. Keep protected from prolonged exposure to light. Avoid

repeated freeze/thaw cycles. Suggest spin the vial prior to opening. The antibody solution should be

gently mixed before use.

Bioinformation

Database links <u>GeneID: 546644 Mouse</u>

Gene Symbol Ly6g

Gene Full Name lymphocyte antigen 6 complex, locus G

Background Ly6G is a component of the myeloid differentiation antigen Gr-1, together with Ly6C. Ly6G is a good

marker for detection of peripheral neutrophils. Expression of Gr-1 in bone marrow correlates with granulocyte differentiation and maturation. Physiological role of Ly6G remains still unclear. Its treatment with antibodies in vivo leads to neutropenia and has inhibitory effect on local immune

responses. _x000D_
