ARG22506 anti-CD39 antibody [A1] (FITC)

Package: 50 μg Store at: 4°C

Summary

Product Description FITC-conjugated Mouse Monoclonal antibody [A1] recognizes CD39

This antibody recognizes the human CD39 cell surface antigen, a ~70-100 kDa molecule expressed on peripheral blood B cells, T cells and monocytes, and weakly expressed by granulocytes.CD39 has intrinsic ecto-ATPase activity (Wang et al. 1996), and expression can be induced on T cells and increased on B cells, as a late activation antigen (Maliszewski et al. 1994).Mouse anti Human CD39, clone A1 has been shown to block MHC independent target cell recognition by hapten-specific CTL (Scholzen et al.

2009).

Tested Reactivity Hu

Tested Application FACS

Host Mouse

Clonality Monoclonal

Clone A1

Isotype IgG1

Target Name CD39

Species Human

Immunogen PHA activated human lymphocytes

Conjugation FITC

Alternate Names CD39; Ecto-ATPase 1; Ecto-ATPDase 1; CD antigen CD39; NTPDase-1; ATPDase; EC 3.6.1.5; Ecto-ATP

diphosphohydrolase 1; NTPDase 1; Ectonucleoside triphosphate diphosphohydrolase 1; SPG64; Ecto-

apyrase; Lymphoid cell activation antigen

Application Instructions

Application table Application Dilution

FACS Neat

Application Note FACS: Use 10ul of the suggested working dilution to label 10^6 cells

 $\hbox{* The dilutions indicate recommended starting dilutions and the optimal dilutions or concentrations}$

should be determined by the scientist.

Properties

Form Liquid

Purification Purification with Protein A.

Buffer PBS, 0.09% Sodium azide and 1% BSA.

Preservative 0.09% Sodium azide

Stabilizer 1% BSA

Concentration 0.1 mg/ml

Storage instruction Aliquot and store in the dark at 2-8°C. Keep protected from prolonged exposure to light. Avoid

repeated freeze/thaw cycles. Suggest spin the vial prior to opening. The antibody solution should be

gently mixed before use.

Note For laboratory research only, not for drug, diagnostic or other use.

Bioinformation

Gene Symbol ENTPD1

Gene Full Name ectonucleoside triphosphate diphosphohydrolase 1

Background The protein encoded by this gene is a plasma membrane protein that hydrolyzes extracellular ATP and

ADP to AMP. Inhibition of this protein's activity may confer anticancer benefits. Several transcript variants encoding different isoforms have been found for this gene. [provided by RefSeq, Aug 2015]

Function In the nervous system, could hydrolyze ATP and other nucleotides to regulate purinergic

neurotransmission. Could also be implicated in the prevention of platelet aggregation by hydrolyzing

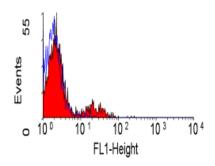

platelet-activating ADP to AMP. Hydrolyzes ATP and ADP equally well. [UniProt]

Calculated Mw ~ 70 - 100 kDa

PTM The N-terminus is blocked.

Palmitoylated in the N-terminal part.
