ARG53754 anti-CD105 / Endoglin antibody [MEM-226] (PE)

Package: 100 tests Store at: 4°C

Summary

Product Description PE-conjugated Mouse Monoclonal antibody [MEM-226] recognizes CD105 / Endoglin

Tested Reactivity Hu
Tested Application FACS

Specificity The clone MEM-226 reacts with CD105 (Endoglin), a 90 kDa type I homodimerizing membrane

glycoprotein expressed on vascular endothelial cells (small and large vessels), activated monocytes and tissue macrophages, stromal cells of certain tissues including bone marrow, pre-B lymphocytes in fetal

marrow and erythroid precursors in fetal and adult bone marrow; it is also present on

syncytiotrophoblast on placenta throughout pregnancy.

Host Mouse

Clonality Monoclonal
Clone MEM-226

Isotype IgG2a

Target Name CD105 / Endoglin

Species Human

Immunogen Recombinant Vaccinia virus containing the human CD105 cDNA.

Conjugation PE

Alternate Names CD antigen CD105; HHT1; Endoglin; ORW1; END

Application Instructions

Application table	Application	Dilution	
	FACS	20 μl / 10^6 cells	
Application Note	* The dilutions indicate recommended starting dilutions and the optimal dilutions or concentrations should be determined by the scientist.		

Properties

Form

Purification Note The purified antibody is conjugated with R-Phycoerythrin (PE) under optimum conditions. The

conjugate is purified by size-exclusion chromatography and adjusted for direct use. No reconstitution is

necessary.

Liquid

Buffer PBS, 15 mM Sodium azide and 0.2% (w/v) high-grade protease free BSA

Preservative 15 mM Sodium azide

Stabilizer 0.2% (w/v) high-grade protease free BSA

Storage instruction Aliquot and store in the dark at 2-8°C. Keep protected from prolonged exposure to light. Avoid

repeated freeze/thaw cycles. Suggest spin the vial prior to opening. The antibody solution should be

www.arigobio.com arigo, nuts about antibodies 1/2

gently mixed before use.

Note For laboratory research only, not for drug, diagnostic or other use.

Swiss-port # P17813 Human

Gene Symbol ENG

Gene Full Name endoglin

Background CD105 (Endoglin) is a homodimeric transmembrane glycoprotein serving in presence of TGFbetaR-2 as

a receptor for TGFbeta-1 and TGFbeta-3. CD105 is highly expressed on endothelial cells and promotes angiogenesis during wound healing, infarcts and in a wide range of tumours and its gene expression is stimulated by hypoxia. CD105 prevents apoptosis in hypoxic endothelial cells and also antagonises the inhibitory effects of TGFbeta-1 on vascular endothelial cell growth and migration. Normal cellular levels

of CD105 are required for formation of new blood vessels.

Function Major glycoprotein of vascular endothelium. Involved in the regulation of angiogenesis. May play a

critical role in the binding of endothelial cells to integrins and/or other RGD receptors. Acts as TGF-beta coreceptor and is involved in the TGF-beta/BMP signaling cascade. Required for GDF2/BMP9 signaling through SMAD1 in endothelial cells and modulates TGF-beta1 signaling through SMAD3. [UniProt]
