

ARG83091
E.coli Residual DNA Detection Kit

Package: 100 tests

Store at: -20°C

Summary

Product Description	E.coli Residual DNA Detection Kit is designed for the quantitative detection of E.coli host cell DNA in intermediates, semifinished products and finished products of various biological products. This kit adopts the principle of Taqman probe to quantitatively detect E.coli residual DNA in samples. The kit is a rapid, specific and reliable device, with the minimum detection limit reaching fg level.
Tested Reactivity	E. coli
Tested Application	FuncSt
Target Name	E.coli Residual DNA
Sensitivity	3 fg/μL
Standard Range	$3 \times 10^1 \sim 3 \times 10^5$ fg/μL

Application Instructions

Assay Time	~1 hour
------------	---------

Properties

Storage instruction	Store the kit at -20°C at all times. All reagents must be kept on ice during the entire experiment.
Note	For laboratory research only, not for drug, diagnostic or other use.
